

Shorter stays in
Emergency Departments

Shorter stays in Emergency Departments

The target is 95 percent of patients will be admitted, discharged, or transferred from an Emergency Department (ED) within six hours. The target is a measure of the efficiency of flow of acute (urgent) patients through public hospitals, and home again.

Improved access to
Elective Surgery

Improved access to elective surgery

The target is an increase in the volume of elective surgery by at least 4000 discharges per year. DHBs planned to deliver 38,097 discharges for the year to date, and have delivered 2002 more.

The target has changed, we are targeting radiotherapy and chemotherapy wait times

Shorter waits for
Cancer Treatment

Shorter waits for cancer treatment

The target is all patients, ready-for-treatment, wait less than four weeks for radiotherapy or chemotherapy. Six regional cancer centre DHBs provide radiation oncology services. These centres are in Auckland, Hamilton, Palmerston North, Wellington, Christchurch and Dunedin. Medical oncology services are provided by the majority of DHBs.

The target has changed, we are targeting eight-month-olds

Increased
Immunisation

Increased Immunisation

The national immunisation target is 85 percent of eight-month-olds have their primary course of immunisation at six weeks, three months and five months on time by July 2013. This quarterly progress result includes children who turned eight months between July and September 2012 and who were fully immunised at that stage.
