

15 February 2019

Re **Official Information Request for insect infestation incidents**

I refer to your Official Information Act request of 17 January 2019 for the following information:

- 1. All documents and communications provided to, and created by, Auckland District Health Board staff or entities, relating to incidents involving insect, vermin or other pest infestation (referred to herein as "infestations") in DHB facilities or properties for the period of five years to the end of the 2018 calendar year.***

These should include, but are not limited to:

- (a) A document containing an overall breakdown for the above time period, in Microsoft Excel table format, of infestation incidents; including date, facility(s), type of creature(s), and cost to remedy.***
- (b) Records, documents and communications of any and all complaints made about infestations by members of the public, members of staff, or other parties.***
- (c) The total number of infestation complaints received, broken down by year for the above time period.***
- (d) The total amount spent on infestation remedies, broken down by year, for the above time period.***
- (e) Email or other messaging correspondence relating to infestations for that time period.***
- (d) Any relevant commentary from a representative.***

Auckland DHB has contracted pest control services with Rentokil Initial to provide insect control services across the Auckland hospital campus. They have held the contract since February 2015 and provide a number of preventative and reactive services as follows:

- Prevention
 - Our pest control provider has contracted schedules for prevention of rodents, insects and flying insects, with on-going servicing of equipment and areas as per these schedules. This service is set and does not change unless agreed by Auckland DHB and Rentokil Initial
- Treatment
 - Within our current contract, we have provisions for one off treatments of issues, which are regularly performed by our service provider. These services are requested by individual departments and completed by Rentokil Initial
 - These services can be for treatment of one off issues, or as a measure of on-going prevention over and above what our scheduled services include. In terms of prevention, where ever possible, we aim to have these preventative steps added to our contracted schedules.

A summary of costs for both prevention and one off treatments is outlined below:

Year	Prevention (\$)	One Off Requests (\$)*
2015 (Feb – Dec)	37,404.35	13,350
2016	35,294.34	14,200
2017	38,198.98	19,200
2018	40,132.65	21,960

- One Off Requests refers to both requests made for treatment of an out of scope requirement and on-going preventative steps made by departments. It is not possible to separate these two costs.

Auckland DHB has approximately 11,000 employees, with many patients and family/friends coming through our sites every day. It is important with the scale of our operation that we have adequate preventative steps in place. As well as this, all requests for treatment are processed immediately to prevent one off issues from escalating and spreading.

This response will cover the period from 2015 (February to December) to 2018. If you wish to seek information for the 2014 year, we will be obliged to consider charging under section 18(f) where the information cannot be made available without substantial collation or research.

Your specific requests relating to your question are dealt with as follows:

- (a) A document containing an overall breakdown for the above time period, in Microsoft Excel table format, of infestation incidents; including date, facility(s), type of creature(s), and cost to remedy.**

We have included documentation outlined in the requested for the time period Feb 2015 to End of year 2018. This information is readily available and as such has been included as per your request

- (b) Records, documents and communications of any and all complaints made about infestations by members of the public, members of staff, or other parties.**

Detailed information about individual call outs are not held by the Auckland DHB but rather referred through the contractor. Rentokil Initial details of call outs have been provided.

- (c) The total number of infestation complaints received, broken down by year for the above time period.**

See previous list of Rentokil Initial callouts

(d) The total amount spent on infestation remedies, broken down by year, for the above time period.

The summary of total annual costs paid by the Auckland DHB for callouts covering treatments and remedies is included above.

(e) Email or other messaging correspondence relating to infestations for that time period.

Requests made for treatment or preventative work are recorded through the contractor receipt and action of the request. That information has been provided as above.

- **Any relevant commentary from a representative.**

We would need to clarify your reference to a commentary and you should, in the first instance, contact our Auckland DHB communications team at communication@adhb.govt.nz and they will be able to assist.

I trust this information answers your questions.

You are entitled to seek a review of the response by the Ombudsman under section 28(3) of the Official Information Act. Information about how to make a complaint is available at www.ombudsman.parliament.nz or freephone 0800 802 602.

Please note that this response, or an edited version of this response, may be published on the Auckland DHB website.

Yours faithfully

Ailsa Claire, OBE
Chief Executive
